

**Contact List for the  
Environmental Justice Thriving Communities Technical Assistance Centers (TCTAC) Program  
August 2023**

**Program Description:** EPA has selected 16 Environmental Justice Thriving Communities Technical Assistance Centers (EJ TCTACs) in partnership with the U.S. Department of Energy that will receive \$177 million to help underserved and overburdened communities across the country. Each of the technical assistance centers will receive at least \$10 million to remove barriers and improve accessibility for communities with environmental justice concerns. With this critical investment, these centers will provide training and other assistance to build capacity for navigating federal grant application systems, writing strong grant proposals, and effectively managing grant funding. In addition, these centers will provide guidance on community engagement, meeting facilitation, and translation and interpretation services for limited English-speaking participants, thus removing barriers and improving accessibility for communities with environmental justice concerns. Each of the technical assistance centers will also create and manage communication channels to ensure all communities have direct access to resources and information.
